Description

Our tether mounting puck may be used with any of our Tethered Styluses to form a complete solution.

The #PUC2 mounting puck is a 7/8" dia. by approx. 1/4" high aluminum disk with a peel & stick rubber adhesive backing and a #6 screw included.

Model #PUC2 comes complete with an, optional use, black plastic stylus clip that any of our 1/4" to 5/16" styli will snap into for storage.

To use: peel off the permanent-adhesive backing, and stick the puck to any surface that is close to your touch screen. Use the included #6 screw to attach the plastic-clip and/or the #10 ring terminal on our tethered stylus** , to the puck for permanent mounting. Puck allows stylus tether to rotate so tether can not become twisted.

May be used with the holder clip and without any tether to just keep a stylus handy. A steel clip is also available.

Comes with instructions for assembly and mounting.

Order the stylus with tether separately, stylus w/tether is NOT included with item #PUC2.
